INTRODUCTION

This report presents 1986 statistical profiles for Alberta and one of Alberta's Provincial Electoral Divisions (PED). A PED is a territorial unit entitled to return a Member to serve in the Alberta Provincial Legislative Assembly. Based on 1985 boundaries, there are currently 83 PED's in Alberta. The profiles provide information on a variety of socio-economic characteristics and are supplemented by a comparative summary table for all constituencies. All data have been tabulated from information collected by Statistics Canada during the 1986 Census of Canada.

Data in the profiles have been randomly rounded (either up or down) to a multiple of "5" which provides protection against direct, residual or negative disclosures without adding significant error to the data. However, since totals are independently rounded, they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various tabulations. Users are advised to refer to the appendices for further information pertaining to data quality, definitions and electoral maps.

On some Indian reserves and Indian settlements in the 1986 Census, enumeration was not permitted or was interrupted before it could be completed. Data are therefore not available for the incompletely enumerated reserves and settlements and are not included in the profiles.

Should you have any questions or require additional information, please contact Data Services, Alberta Bureau of Statistics, (403) 427-3058.

Note to Users

These profiles incorporate some revised Alberta Bureau of Statistics' PED population estimates and new information on education, income, ethnic origin and labour force. As such, they supersede the earlier edition.

¹ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". TECHNICAL NOTES

Confidentiality and Random Rounding

The figures shown in this report have been subjected to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with an identifiable individual. Under this method, all figures including totals are randomly rounded (either up or down) to a multiple of "5". This technique provides strong protection against direct, residual or negative disclosures without adding significant error to the census data. However, since totals are independently rounded, they do not necessarily equal the sum of individual rounding figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census tabulations.

Sampling

The 1986 Census of Canada collected data on either a 100 percent basis (i.e., from all households), or on a 20 percent sample basis (i.e., from a random sample of one in five households) with data weighted to provide estimates of the entire population. All households responded to basic questions pertaining to population, family and household characteristics while the sample population responded to more detailed questions regarding ethnic origin, income and labour force activity. Users should note that residents of institutional collective dwellings were excluded from the sample population.

Incompletely Enumerated Indian Reserves and Settlements

On some Indian reserves and Indian settlements in the 1986 Census, enumeration was not permitted or was interrupted before it could be completed. Data is therefore not available for these reserves and settlements and are not included in sub-provincial aggregations. While for higher level geographic areas (Canada, provinces, census metropolitan areas and census agglomerations) the impact of the missing data is very small, it can increase for smaller areas containing a larger proportion of affected reserves and settlements. While it is not possible to estimate the population of each incompletely enumerated reserve, Statistics Canada estimates the total incompletely enumerated population at 9,453 and dwellings at 1,949. A list of the incompletely enumerated reserves and settlements for Alberta is available upon request.

Comparability and Quality of Data on Mother Tongue

The question of mother tongue was the same for both 1981 and 1986 Censuses, however instructions to the respondents were different. In 1981, the respondents were asked to indicate only one language. Nevertheless, many persons reported more than one. The instructions in 1986 were therefore changed so that persons could indicate two mother tongues if they had learned them at the same time and had spoken one as frequently as the other when they were children. Caution must therefore be used when comparing results over time.

Structural Type of Dwelling

In the 1986 Census, there was a higher rate of non-response to the structural type of dwelling question than in 1981 (2.3% compared with 0.5%). It should be noted that the information on structural type was reported by the Census Representative in 1986, whereas in 1981, it was reported by the household respondent. The impact of this higher non-response on overall data quality should be small except in a limited number of geographic areas where non-response may have been concentrated. Movable dwellings, one category of structural type of dwelling, was suspected to be under-reported in the 1986 Census. This is thought to be due to the mis-classification of a number of mobile homes as other structural types, primarily single-detached dwellings. For large geographic areas, this error is not expected to have a significant impact upon other dwelling categories because of the relatively large number of dwellings in those areas.

Living Arrangements

The population dealt with in the living arrangements universe differs from that in the total population universe in that it includes only persons in private households and excludes the following: persons residing in collective dwellings, populations outside Canada, persons enumerated away from their usual place of residence and additions made on the basis of undercoverage.

APPENDIX II

DEFINITIONS

Census Family

Refers to a husband and wife (with or without children who have never married, regardless of age), or a lone-parent of any marital status, with one or more children who have never married, regardless of age, living in the same dwelling. For census purposes, persons living in a common-law type of arrangement are considered as married.

Ethnic Origin

Refers to the ethnic or cultural group to which the respondent or the respondent's ancestors, excluding institutional residents, belong. Ethnic or cultural group refers to the "roots" or ancestral origin of the population and should not be confused with citizenship or nationality.

Highest Level of Schooling

Refers to the highest grade or year of elementary or secondary school attended or the highest year of university or other non-university completed for population 15 years of age and over, excluding institutional residents.

Income

Refers to the total income received during the 1985 calendar year by persons 15 years of age and over (excluding institutional residents) from the following sources: gross wages and salaries; net self-employment income; Old Age Security Pension and Guaranteed Income Supplement; Canada/Quebec Pension Plan benefits; Family Allowances; Federal Child Tax Credit; U.I.C. benefits; other income from government sources; dividends, interest and other investment income; retirement pensions, superannuation, annuities and other money income.

The average income refers to the weighted mean total income of a particular group (i.e., census families). Average income is calculated by dividing the aggregate income of the group by the number of members in that group whether or not they reported income.

Institutional Resident

Refers to a resident of an institutional collective dwelling, other than staff members and their families. Dwellings include orphanages and children's homes, special care homes and institutions for the elderly and chronically ill, hospitals, psychiatric institutions, treatment centres and institutions for the physically handicapped, correctional and penal institutions, young offender facilities and jails.

Labour Force

The total labour force consists of persons 15 years of age and over (excluding institutional residents) who were either employed or unemployed during the week prior to enumeration (June 3, 1986). The experienced labour force is derived by deleting from the total labour force those unemployed persons who have never worked or who had worked only prior to January 1, 1985.

By Occupation (Based on 1980 Classification)

Refers to the kind of work persons were doing during the reference week, as determined by their reporting of their kind of work and the description of the most important duties in their job.

By Industry (Based on 1980 Classification)

Refers to the general nature of the business carried out in the establishment where the person worked, as indicated by the name of the employer and the kind of business, industry or service.

DEFINITIONS (continued)

Marital Status

Refers to the conjugal status of a person:

Single, Never Married - persons who have never married (including all persons less than 15 years of age) and persons whose marriage was annulled.

Married - persons whose husband or wife is living; includes separated persons and those living in common-law.

Separated - persons who have been deserted or who have parted but have not obtained a divorce.

Widowed - persons who have lost their spouse through death and who have not remarried.

Divorced - persons who have obtained a legal divorce and who have not remarried.

Mother Tongue

Refers to the first language learned in childhood and still understood by the individual at the time of the census.

Occupied Private Dwelling

Refers to a private dwelling in which a person or group of persons is permanently residing on Census Day. Dwellings whose usual residents are temporarily absent on Census Day are also included.

Postsecondary Education

The term "postsecondary" refers to some years of schooling completed at university or at institutions other than university, secondary (high) school or an elementary school. Examples of the latter include community colleges, institutes of technology, private trade schools, private business colleges and schools of nursing.

Private Household

Refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada. The number of households equals the number of dwellings. Private households can be divided into family and non-family households. A family household refers to a household that contains at least one census family (e.g., husband-wife or lone parent). A non-family household refers to a person who lives alone in a private dwelling or to a group of persons who occupy a private dwelling and do not constitute a census family.

Structural Type of Dwelling

Refers to the structural characteristics and/or dwelling configuration:

Single-Detached House - a single dwelling not attached to any other dwelling or structure (except its own garage or shed). A single detached house has open space on all sides and has no dwellings either above or below it.

Apartment, Five or More Storeys - a dwelling unit in a high-rise building which has five or more storeys.

Movable Dwelling - comprises mobile homes and other movable dwellings (e.g., tent, recreational vehicle, motor home, railroad car or houseboat).

All Other Types - comprises semi-detached house, row house and other single attached house; apartment or flat in a detached duplex; and apartment in a building that has less than five storeys.

Tenure

Refers to whether some member of the household owns or rents the dwelling. A dwelling is classified as "owned" even if it is not fully paid for, such as one which has a mortgage or some other claim on it. The dwelling may be situated on rented or leased land or be part of a condominium (whether registered or unregistered).

⁽¹⁾ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". Also see Appendix I - note on Incompletely Enumerated Indian Reserves.

⁽¹⁾ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". Also see Appendix I - note on Incompletely Enumerated Indian Reserves.

⁽¹⁾ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". Also see Appendix I - note on Incompletely Enumerated Indian Reserves.

⁽¹⁾ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". Also see Appendix I - note on Incompletely Enumerated Indian Reserves.

⁽¹⁾ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". Also see Appendix I - note on Incompletely Enumerated Indian Reserves.

⁽¹⁾ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". Also see Appendix I - note on Incompletely Enumerated Indian Reserves.

⁽¹⁾ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". Also see Appendix I - note on Incompletely Enumerated Indian Reserves.

¹ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". Also see Appendix I - note on Incompletely Enumerated Indian Reserves.

⁽¹⁾ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". Also see Appendix I - note on Incompletely Enumerated Indian Reserves.

⁽¹⁾ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". Also see Appendix I - note on Incompletely Enumerated Indian Reserves.

⁽¹⁾ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". ⁽¹⁾ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". Also see Appendix I - note on Incompletely Enumerated Indian Reserves.

¹ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". Also see Appendix I - note on Incompletely Enumerated Indian Reserves.

¹ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". Also see Appendix I - note on Incompletely Enumerated Indian Reserves.

⁽¹⁾ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". Also see Appendix I - note on Incompletely Enumerated Indian Reserves.

⁽¹⁾ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". Also see Appendix I - note on Incompletely Enumerated Indian Reserves.

⁽¹⁾ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". Also see Appendix I - note on Incompletely Enumerated Indian Reserves.

⁽¹⁾ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". Also see Appendix I - note on Incompletely Enumerated Indian Reserves.

⁽¹⁾ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". Also see Appendix I - note on Incompletely Enumerated Indian Reserves.

¹ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". Also see Appendix I - note on Incompletely Enumerated Indian Reserves.

¹ For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category "on reserve" has been created for 1986 Census products to apply to all occupied private dwellings on reserves whether originally reported as "owned" or "rented". Also see Appendix I - note on Incompletely Enumerated Indian Reserves.
